*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-41, and 81-85, drawn to a force sensor for sensing a touch force applied to a touch surface, classified in class 345, subclass 173.
  - II. Claims 42-80, and 101-110, drawn to a structure of a force sensing touch device, classified in class 349, subclass 113.
  - III. Claims 86-100, drawn to a method for manufacturing a force sensor applied to a touch surface, classified in class 361, subclass 213.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as drawn to a force sensor for sensing a touch force applied to a touch surface, so group I does not require a structure of a force sensing touch device of group II, and a method for manufacturing a force sensor of group III. In the instant case, invention II has separate utility such as a structure of a force sensing touch, so group II does not required a force sensor for sensing a touch force applied to a touch surface of group I, and a method for manufacturing a force sensor applied to a touch surface of group III. In the instant case,

Art Unit: 2674

invention III has separate utility such as a method for manufacturing a force sensor applied to a touch surface, so group III does not require a structure of a force sensing touch device of group II, and a force sensor for sensing a touch force applied to a touch surface of group I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Robert Plotkin on 8-12-04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
